a sandbox game of a kind i never played - you walk in a town streaming, farting, gathering likes and donations, slapping other people. however i could not enter any building, maybe its is the works; i did not find any weapon, though i saw people with weapons i don't know where they have taken the weapons.

The main reason i was interested in a game was graphics - bright, light - i just loved it!

game costs cheap, i recommend to try it - hope it will grow to something interesting and descent.. I liked the game, but it would improve a lot if It had a more developed story. A great simple game that I can actually afford. Wouldn't say better or worse than Minecraft or Terreria but otherwise, it's a good old retro game I had for many years.. First and the best strategy game I'm ever play!. Fun little arcade style platformer. Controls aren't as precise as they could be (there is a noticeable delay between landing and jumping) but i managed to adapt relatively quickly, oh and some people might get motion sick from it. (there is a lot of spinning graphics)

. I liked the game. The developer has tried hard and is not going to throw his game. In this world, more good is needed. In the game we are an exorcist. The plot and actions are well thought out and made. We look forward to further development of the game. Good luck. this game had a lot of potential but was rushed to market.

effects suffered many bugs over time on multiple platforms likely as a result of attempting to build cross-platform.

to date, the game still works, just be prepared to experience missing textures, crashing and a lack of multiplayer (because Gamespy was shut down by a bunch of suits who didn't realize what Gamespy represented in the world.)

i do miss the classic D&D titles from SSI and similar, fiberglass sleeved floppies, every game provided the experience you saw in pictures. today, though, you buy a game and it mostly works, then the servers get shut down and the bugs get worse over time.

sad times.

. I am not able to link this DLC with the game. How to do this?. Not close to Total War!

Not worth it, I hardly ever play it :(

Hello, I have been a Gm over 30 years. I endorse this program as a fun and easy way to make virtual play spaces for your RPG games. The software has a bit of a learning curve but is designed to create virtual set pieces for your RPG games by allowing the user to create either 3d environments or 2D ones for there game play.

Sadly another group is pushing a copy of this game as there original program but its an obvius ripoff of this one. This program will allow you to create environments with more detail than the current offerings and with light effects, water and sky box support your imagination is unlimited. I also ported over elements from unity that support my own design ideas.

The creators are committed to this and love open input, please give the program a look for yourself.. Excellent game for the price! It's a fun simple space adventure with a relatively entertaining story behind it.

My only issue was with how slow flying across the galaxy became towards the end. It was rather tedious that none of the higher level ships were very fast and the quests tended to send you back and forth across the whole system.. So far, shows potential. Only one music track, which gets annoying quickly, so I turned the music volume way down. There should be more variety. Ideally, you could set a music "style" in the options menu, such as "calm and relaxing", "upbeat", "ambient nature", etc. Also, the swing meter needs work, both the UI as well as the click detection, particularly on the 3rd click. Right now it's a bit confusing. Seems like you have to push the button right at the start of the red zone, whereas most games expect you to try and press in the center. At minimum, it should at least be explained more clearly in the tutorial. I would love to be able to select player voices, which could be turned on/off in the options, with some different ones to choose from. Even simple "Yes!" or "[Awww...](#)" would make it a little livelier. A career mode/single player tournament mode against a bunch of avatar competitors with unique personalities would be cool.. All I can say is Catch-A-Ride!!!. Despite all negative reviews this game is rather good and I highly recommend it.

It's not so expensive and I have much fun during gameplay.. Redemption was a pretty straight forward puzzle/fps game. It was a different game than I usually play and was fairly easy once you get a hang of the premise of the game. It kept me busy for about 20 hours.. Possibly the worse game in the Travel Riddles series. Boring game play, uninspiring music or visuals. No excitement at all. I would not pay full price for this. 3V10
